

LYSOFORTE® EXTEND

A nutrient absorption enhancer solution, containing a unique synergistic combination of lysophospholipids, monoglycerides and a synthetic emulsifier to improve feed efficiency and profitability.

It effectively improves the digestion of energy-rich dietary lipids and subsequently stimulates the absorption of fatty acids and other essential nutrients. LYSOFORTE EXTEND positively influences animal productivity, supports animal health and optimal carcass and egg quality with a reduced feeding cost, resulting in more profit.

MODE OF ACTION

- Increases the emulsification of the dietary fat matrix
- Accelerates the further hydrolysis and absorption of lipids
- Improves the complete digestion process
- Enhances the absorption of other essential nutrients such as carbohydrates, amino acids and vitamins

FEATURES AND BENEFITS

- Improves animal performance, egg- and carcass quality
- Applicable with a reliable nutritional matrix for diet reformulation significantly reducing feed costs
- Promotes gut morphology
- Available in a dry or liquid form
- User friendly, easy to handle and apply
- Safe to use, by workers, in equipment, and for the environment
- Delivered with specialized services such as engineering application, laboratory and technical support

PACKAGING

- 25 kg bags or jerrycans
- 1,000 kg IBC
- Stored in a cool, dry place in the dark and in the original package
- Keep container closed when not in use

SUITABLE FOR:

APPLICABLE FOR TREATING:

VALUABLE NUTRIENT PREMIX

FEED AND COMPOUND FEED

KEMIN®
